

LADIES AND GENTLEMEN,

we would like to inform you that in the current list of scientific journals and reviewed materials from international conferences published by the Minister of Education and Science on December 1, 2021, the journal *Logistics and Transport* has obtained 20 points, which is quite an important argument in the process of university evaluation and the evaluation of the journalistic achievements of the authors. We see the received assessment as recognition of the high substantive and editorial level of the published articles.

We have focused our foregoing publishing activities on further development, creating an international journal, gathering knowledge from all areas of science dealing with the issues related to logistics, transport, management, construction and education. We have developed a strategy for the further development of cooperation with representatives of social, technical and exact sciences by providing them with a means of communication and methods of effective promotion of their research results. We support interdisciplinary research cooperation among communities representing various fields and disciplines of science.

The Scientific Council of the *Logistics and Transport* journal consists of outstanding researchers from Poland, other European countries and the United States,

representing various disciplines and fields of science. In turn, the group of thematic editors includes recognized researchers from Poland, authors of a number of publications, authorities in a given scientific discipline.

We encourage not only academic teachers but also practitioners to publish in the university's international quarterly and to cooperate in constantly adapting the journal to new circumstances and needs.

From No. 3-4 (51-52) 2021, the *Logistics and Transport* journal is published in a changed format that is more convenient for readers.

Enjoy reading this issue.

prof. dr hab. Eng. Zbigniew Ścibiorek - Editor-in-Chief
